

The premium choice prescription collection kiosk

Why choose the Pharmaself24?

The Omnicell Pharmaself24 is Europe's market-leading 24/7 prescription collection point.

And we believe the reason more customers choose the Pharmaself24 than any other collection kiosk is our focus on quality, delivering maximum uptime, more patients and rapid ROI for our customers.

As an Omnicell customer you'll benefit from a solution built from premium components at a leading-edge robotics production facility in Italy, using stringent end-of-line quality control and testing processes.

And, once your machine is installed, you're backed by the service, support and product development resources of a global NASDAQ healthcare technology company with over 30 years' experience in transforming care delivery for healthcare professionals.

THE COMPACT AND MULTI PHARMASELF24 MODELS

STATE-OF-THE-ART MANUFACTURING

Videosystem, our manufacturing partner for the Pharmaself 24, has been designing, producing and supporting the delivery of robotic prescription dispensers for over 30 years, and is fully ISO 9001 accredited.

PROVEN SUCCESS IN THE UK

Pharmaself24 customer [HMI Pharmacy in Lancashire](#) has been running its Pharmaself24 for over five years, and has increased prescription patients by 50%. The Pharmaself24 has dispensed thousands of prescription items, and is still going strong! Take a look at this and other success stories [here](#).

Fast facts about the Pharmaself24

Quality and flexibility of design

- The stylish front panel design is by Synthesis Design, an Italian design studio specialising in product and automotive design
- Its modular construction allows for easy upgrades and refurbishment to future-proof your investment
- At just 89cm wide the slimline Pharmaself24 allows for easy and discreet installation in shop windows or walls
- An integrated 24-inch colour touchscreen gives outstanding visual clarity and performance in bright sunlight courtesy of a high-performance ventilation kit
- Backed by years of research and development, the user interface is easy and intuitive for patients and healthcare staff alike, encouraging quick adoption
- Pharmaself24 is fully compliant with CE certification and all relevant electrical safety testing

Customisable to your business

- Front panels and frames can be powder coated in a range of colours, and your logo can be added to front screens and service panels
- Deployment across 100s of installs has allowed our manufacturing partner to develop a range of install options to accommodate steps, risers, and height issues, as well as L-shaped models where space restrictions are an issue
- The user interface can be customised, to cater for specialist workflows
- With an API we can set up an easy two-way integration with your PMR system
- You can access automated usage reporting for both quick oversights and more detailed analysis, downloadable in branch or for export to head office systems

Safe, secure and reliable

- The robust design is highly resistant to damage and vandalism, with IK10 impact certification - the highest rating available
- Omnicell is certified under the Cyber Essentials Plus scheme, passing a rigorous vulnerability test against hacking and phishing attacks by security experts
- Data transfer to and from the Pharmaself24 is via Advanced Encryption Standard (AES) 256, a virtually impenetrable encryption algorithm
- Omnicell has met the rigid standards of the NHS Data Security and Protection Toolkit since 2018
- Multiple barcode scanning of packs whilst loading ensures accuracy, but without compromising speed
- Regular software updates provide ongoing security enhancements
- Telemetry monitoring allows us to identify any remedy potential machine performance issues quickly

GROWING ADOPTION WORLDWIDE

The Pharmaself24 has over 700 installations across Europe and the USA. In the UK, over 2 million prescriptions have been collected so far - now at 100,000 collections a month and rising!

highest rating possible for resistance to physical damage
